## Digital Printing

It's a colourful world out there and most of it is digitally printed. Digital photographic printing for high resolution scanned images with no dots. Ink jet printing, both indoor and outdoor with UV stable inks and print onto varied substrates such as paper, vinyl & canvas. Dye sublimation printing for those machine washable fabrics. Digital Wallpaper™ is a process that is designed specifically for the indoor mural and retail shop markets. And the latest technology to hit our shores is Flatbed printing (direct to substrate), a process allowing direct print to rigid & uneven surfaces such as glass, acrylic, doors, ceiling tiles and even venetian blinds! Of course the traditional methods still play a part - cut vinyl, silk screen printing and sign-writing, but alas the potato print is no more!

Portable display graphics

Custom printed window blinds

Digital print mounted to table

Flatbed printed wallpaper murals

Digitally printed jigsaw puzzle

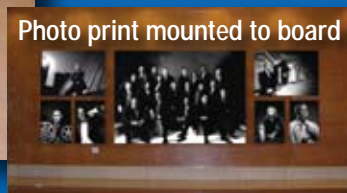

Photo print mounted to board

High quality digital wallpaper

High quality digital wallpaper

Inkjet and eco solvent printing for vibrant colour reproduction onto photo quality papers, vinyl, artist canvas, backlit films and wallpaper. Prints can be mounted to various substrates and finished with a laminate of your choice.
