

**m2**  
BY WINSTAND

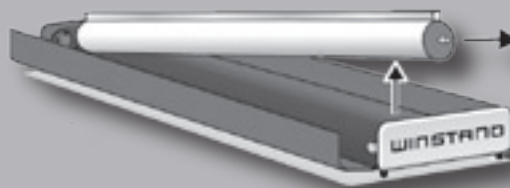

Inspired by solutions found on racing yachts rather than roller blinds, the Winstand M2 has no springs, but is built around an innovative way to work with tension, the patented Modular Tension System - MTS® - that makes graphics media handling a breeze. All these features fit into a sleek European designed alloy shell. It takes less than 30 seconds to set up; the weight is around 6kg (12 lbs), including case and graphic; and the graphic cartridge can be easily replaced when new artwork is needed. This is the hottest item in the backdrop/display manufacturing industry today for cost, convenience, durability and professional eye-catching appeal.

How many times have you wished for an easier way to change the graphics in your banner stands? Wouldn't it be nice if your staff could do it themselves? With the Winstand M2 you can now carry multiple graphics with you and change them out on the fly.
