

# Premier Portable Geodesics

Premier™ Pop-ups have the ability to be linked to achieve a variety of stand shapes and configurations to create more impressive exhibit solutions

This transformation is achieved using Premier™ Portable Geodesic structures.

This unique product is an adaptable modular concept, which can grow and change to meet any display requirement.

The unique 4-way hub connector allows premier pop-ups to be easily added to and developed.

Enhancements such as bridges, towers, columns, showcases and lightboxes customise your stand and can be used again and again at different venues in different configurations.

Premier™ framework can be joined by channel bars or connectors creating 'ghost panels'. This enables you to expand your display without adding extra framework.
